David Kahn

1968

1. A. A. Albert. "Some Mathematical Aspects of Cryptography." Talk delivered before the American Mathematical Society at Manhattan, Kansas, November 22, 1941. 24 pages.

2. M. de Vries. "Quantificering in Language and Cryptanalysis." Report SP 82 of the Statistical Department of the Mathematical Center, Amsterdam. Translated from the Dutch by Erwin L. Newman. 22 pages.

3. Hans Rohrbach. "Modern Cryptography." Translated by Howard T. Oakley from Archiv der Elektrischen Ubertragung, II (1948), [illegible] 12 pages.

4. Rudolf Schauffler. "An Application of Cyclic Permutations and Their Theory." Doctoral dissertation, Philipps University at Marburg/Lahn. 1948. Translated by Bradford Hardie. 130 pages.

5. Rudolf Schauffler. Two Articles Related to Code Words. Translated by Bradford Hardie. 44 pages.
   a) "Uber die Bildung von Codewortern." Archiv der Elektrischen Ubertragung, X (1956), 303-314.
   b) "Die Assoziativitat im Ganzen, besonders bei Quasigruppen." Mathematische Zeitschrift, LXVII (1957), 428-435.

6. Two articles on "Presences," translated from the Revue Internationale de Criminologie et de Police Technique. 13 pages.
   a) A. Cuelenaere. "The Use of the Ideas of 'Presence' and 'Mean Quadratic Frequency' for Distinguishing between Mono- and Polyalphabetic Cryptograms, Particularly in Dutch." XI (January-February-March, 1957).
   b) L. Sacco. "Derivation of the Formula for Presences." (October-November-December, 1957).

7. Howard T. Oakley. An Application of Bayes' Theorem to the Solution of Transposition Ciphers. 16 pages.

8. Richard E. Powell. Article on the Hill Cipher. April, 1950. 16 pages.

9. Luigi Sacco. "On Algebraic or Polygraphic Ciphering." Translated by J. M. Wolfe and Salvatore Bonafide from Manuale di Crittografia. 16 pages.

10. Two Cryptanalytic Articles on the Hill Cipher from the Journal fur die reine und angewandte Mathematik. 71 pages.
    a) Jack Levine. "Analysis of the Case n = 3 in Algebraic Cryptography with Involutory Key-Matrix and Known Alphabet." CCXIII (1963), 1-30.
    b) Jack Levine with Joel V. Brawley, Jr. "Involutory Commutants with Some Applications to Algebraic Cryptography." CCXXIV (1966), 26-43, CCXXVII (1967), 1-24.

1. John Nelson Tunstall. "The Utilization of Matrix Congruences in Algebraic Cryptography." Master's thesis, University of North Carolina. 1964. 62 pages.

12. Joel V. Brawley, Jr., and Jack Levine. Equivalence Classes of Linear Mappings with Applications to Algebraic Cryptography. Technical Report No. 8. 1968. 41 pages.
